

Jay Shop Cloud Storage Credentials & Configuration Reference

Generated: July 27, 2026

Purpose

This document contains the vital information needed to manage the Jay Shop media storage backend. Keep it safe and do not share it publicly.

Architecture Summary

- **Hero videos:** stored as static assets in `public/hero-videos/` and committed to Git.
- **Product/brand/gallery/style/player/customer images:** stored in Cloudflare R2 bucket `jayshop-media`.
- **Legacy Vercel Blob URLs:** still supported for old records, but new uploads no longer use Blob.

Cloudflare R2 Configuration

Setting	Value
Service	Cloudflare R2 Object Storage
Bucket name	<code>jayshop-media</code>
Account ID	<code>904dd6614298852ec5a343c3109d57af</code>
Location	Eastern North America (ENAM)
S3 API endpoint	<code>https://904dd6614298852ec5a343c3109d57af.r2.cloudflarestorage.com</code>
Public URL	<code>https://pub-3d3bdd757883440d8a771904dea90451.r2.dev</code>

API Credentials

Variable	Value
<code>R2_ACCESS_KEY_ID</code>	<code>09db0dedb81c5c72c983142fd3dcd64f</code>
<code>R2_SECRET_ACCESS_KEY</code>	<code>0026c217c90e9e70df33937f46f6698035bddcad080760bf0209df5e407373343f81</code>

Security note: These credentials grant read/write access to the `jayshop-media` bucket. Store them in a password manager. Do not commit them to Git or share them in public channels.

Vercel Environment Variables

The following variables are configured in the production Vercel project:

- `R2_ENDPOINT=`
`https://904dd6614298852ec5a343c3109d57af.r2.cloudflarestorage.com`
- `R2_ACCESS_KEY_ID=09db0dedb81c5c72c983142fd3dcd64f`
- `R2_SECRET_ACCESS_KEY=`
`c217c90e9e70df33937f46f6698035bddcad080760bf0209df5e407373343f81`
- `R2_BUCKET_NAME=jayshop-media`
- `R2_PUBLIC_URL=`
`https://pub-3d3bdd757883440d8a771904dea90451.r2.dev`

Important URLs

- **Cloudflare dashboard:** <https://dash.cloudflare.com/904dd6614298852ec5a343c3109d57af/r2/overview>
- **Vercel dashboard:** <https://vercel.com/dashboard>
- **Production site:** <https://jayshop-retail-platform.vercel.app>

Next Steps

1. Verify that R2 uploads work by uploading a test image through the admin panel.
2. Downgrade or delete the Vercel Blob store to stop charges.
3. Consider connecting a custom domain to R2 for production-grade public access.
